2000P09009US01REMARKS

Applicant thanks the Examiner for the remarks and analysis contained in the Office Action. Claim 6 is amended above. New claims 10 and 11 are added. Applicant respectfully requests reconsideration of this application.

Applicant respectfully traverses the rejection of claims 1-7 and 9 under 35 U.S.C. §103 based upon *Knight*.

Regarding claims 1-5, there is no support portion for supporting the fuel injector assembly as recited in claim 1 within *Knight*. There is no motivation for adding such a support portion to the arrangement of *Knight* because *Knight* is basically a hand-held device that is intended to "be plier-like...for convenient operation in one hand of the user or operator." (Column 1, lines 64-65). Accordingly, the device of *Knight* is not adaptable to supporting an entire fuel injector assembly. If one were to attempt to modify it to provide such a support, it would no longer have the characteristic required by the teachings of the *Knight* reference and, therefore, there is no motivation for such a modification and no *prima facie* case of obviousness.

With regard to claims 6-10, the *Knight* tool is a hand-held, manually operated tool. There is no automation anywhere suggested within *Knight*. In fact, it teaches the exact opposite, "it is an object of the present invention to provide simple, inexpensive, compact, light-weight hand operated pull testing tools capable of use in the assembly area or at the work bench." (Column 1, lines 43-46). It follows that *Knight* cannot be modified to be consistent with Applicant's claimed invention without going against the express teachings and intentions of the *Knight* reference. Such a modification is not permissible under 35 U.S.C. §103 and there is no *prima facie* case of obviousness.
